SA BASE SHEET & SA BASE SHEET FR

A premium self-adhered, fiberglass reinforced, modified bitumen membrane (with fire retardant additives)* manufactured to meet the toughest code requirements of the industry. SA Base Sheet & SA Base Sheet FR are manufactured using Adeso® dual-compound technology, where the membrane consists of Styrene Butadiene Styrene (SBS) modified asphalt compound on top and a pressure sensitive adhesive compound on the bottom. The adhesive is covered with a split release liner. SA Base Sheet & Base Sheet FR are finished with a polyolefin film with printed lay lines on the top surface.

BASIC USES

SA Base Sheet & Base Sheet FR membranes are designed for applications where the use of hot asphalt, cold process adhesive, or a propane torch is undesirable. Applications include new roofing, recover (retrofit) and BUR repairs. SA Base Sheet & Base Sheet FR can be used as a waterproofing base sheet applied to approved roof decks or substrates. See the Mule-Hide Self-Adhered Modified Bitumen Application Guidelines for complete specifications and details.

PRODUCT BENEFITS

- Pre-applied adhesive on the back of the sheet.
- Durable - high performance reinforcement mat.
- No hot asphalt, fumes or flames required for installation.
- Excellent long term adhesion to multiple substrates and to base plies.
- Offers low-temp flexibility, puncture and tear resistance.
- Top film surface allows torching or self-adhering approved cap sheets*

*SA Base Sheet FR only
