

# SL Base

## Surface-Leveling Coating for Silicone Roofing Systems

The Right Choice for Low-Slope Roofing Products

**800-786-1492 • mulehide.com**

Rugged • Time-Tested • Weather-Tested

### Gravel Built-Up Roofing (BUR) Obstacles

- The previous option was to restore gravel surfaces using asphalt-emulsion products.
- Applying coating alone typically results in high cost due to the excessive volume required.

### The Solution

- Formulated as a self-leveling silicone, SL Base costs less than our standard roof coating, saving you money.
- Designed to be more free-flowing than other roof coatings, SL Base fills low spots, cracks, and crevices.
- Complete coverage provides a smooth surface and optimal waterproofing performance.

### Scope of Work on a Gravel Roof System

- Inspect existing roof system.
- Remove all loose gravel.
- Power wash the roof surface.
- Perform a moisture survey and replace all wet materials.
- Identify and repair any problematic flashings.
- Apply MultiBase SB bleed-block primer.
- Apply SL Base surface-leveling coating.
- Apply 100% Silicone Roof Coating.
- Inspect the roof to ensure compliance with MuleHide specifications.
