TGFU.R13850  
ROOFING SYSTEMS - PVC  
Revised March 2021**

Any UL Classified Mule-Hide PVC roof covering system is classified for UL2118A Class 4 Impact Resistance when either of the following conditions are met:

1. Minimum 80-mil (nominal thickness) Mule-Hide Products Co. Incorporated PVC membrane is applied over any combination of substrate layers, as specified in the roof covering systems, and the substrate layer(s) are attached with fasteners and minimum 2-in. metal or plastic plates.
2. Minimum 50-mil (nominal thickness) Mule-Hide Products Co. Incorporated PVC membrane is applied over any combination of substrate layers, as specified in the roofing systems, and the top substrate layer is attached with adhesives or asphalt. Lower substrate layer(s) may be attached with fasteners and plates, adhesives or asphalt.
