This Quick Spec is an abbreviated specification and is not meant to replace the full specification. Read the entire System Specification prior to starting the project.

### Application Method:
Brush, Roller or Spray

### General Requirements:
- Existing roofing system must be made watertight with similar materials, including removal and replacement of all wet materials.
- All layers of Aluminum Coatings must be removed.
- Adhesion tests are required to ensure proper adhesion.
- Roof must be clean and dry.
- All seams must be addressed.
- Application temperatures must be 35° F and rising.
- Maximum roof surface temperature cannot exceed 100° F.

### Application Instructions:
- Repair existing roofing system with like materials, including removal and replacement of wet materials.
- Perform a minimum of 2 adhesion tests or a minimum of 1 adhesion test per every 100 squares.
- Power Wash roof with 115 Cleaner and allow to dry.
- Prime entire roof.
- Treat all seams, curbs, and flashings.
- Apply coating per the chart below.

1 The 100% Silicone Coating can be applied in either 2 coats at 1 gal/100 sf per coat (base and finish) or 1 coat at 2 gal/100 sf to achieve this warranty.
2 The 100% Silicone Coating can be applied in either 2 coats at 1.25 gal/100 sf per coat (base and finish) or 1 coat at 2.5 gal/100 sf to achieve this warranty.
