

Description:

PVC Scuppers are designed to be used on rectangular outlets extending through walls or raised roof edges in the Mule-Hide PVC roofing system. Scuppers are custom prefabricated with one skirt or with a single skirt and metal flange.

- Fabricated in 24-gauge vinyl-coated metal with a 40-mil 6" membrane skirt factory welded to the flange.
- Custom configurations, including incorporating the scupper with a collector box, are available upon request.
- Prefabricated scuppers with a 2" terminating flange reduce field fabrication and installation time.
- Available in white, tan, and gray PVC coated metal.

Contact Mule-Hide to request a color chart, samples and information regarding custom metals and finishes.

Installation:

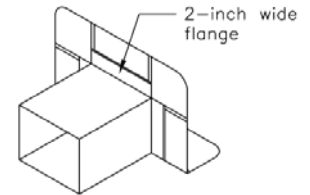

1. Install in accordance with Mule-Hide detail drawings #MHP-2060.
2. Any deviation from the requirements set forth in the detail drawings must be pre-approved, in writing, by the Mule-Hide Technical Department.

Warranty:

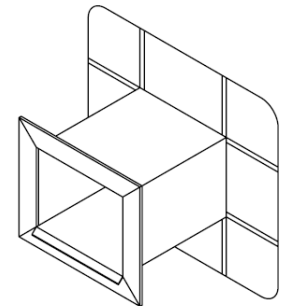

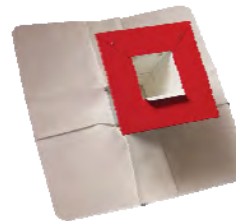

Mule-Hide metal accessories are eligible for warranty coverage when properly installed as part of a Standard or Premium warrantable system. Please visit our Web site or call us for more information.

Technical Services:

Product samples, detail sheets, color chips, and color chart are available for your submittal package. For assistance with questions or submittals, contact your local representative or call Mule-Hide.
